

The **AcuFocus** KAMRA* Inlay

The AcuFocus KAMRA inlay is a thin, opaque ring perforated with 8,400 micro-holes to provide for nutrient transport. When placed in the cornea, the small-aperture technology of the inlay provides increased depth-of-focus and improved near visual acuity while maintaining good distance visual acuity.

* KAMRA is a trademark of AcuFocus, Inc.

GREETINGS FROM Dr. Kazuo Tsubota (Program Coordinator)

Welcome to all the participants to this symposium on treating presbyopia and introducing this new and exciting technology, cornea inlay by AcuFocus. I would like to take this opportunity to thank our distinguished speakers who have contributed their time to educate us. Treatment of presbyopia was just a dream 10 years ago, but now it has become a reality and we have entered an exciting new era.

PROGRAM

14:00-14:05 **OPENING REMARKS**

Dr. Kanjiro Masuda ... Professor Emeritus, The University of Tokyo

14:05-16:25 **FIRST SESSION** (16:05-16:25 Q & A)

MODERATOR: Dr. Kazuo Tsubota ... Professor, Keio Univ.

14:05-14:35

History of Corneal Inlays

Dr. Richard L. Lindstrom ... Professor Emeritus, University of Minnesota

PROFILE Dr. Richard L. Lindstrom, founder and attending surgeon of Minnesota Eye Consultants and Adjunct Professor Emeritus at the University of Minnesota Department of Ophthalmology, is a board-certified ophthalmologist and internationally recognized leader in corneal, cataract, refractive and laser surgery.

14:35-14:55

KAMRA Inlay Development

Dr. James F. Socks ... Chief Commercial Officer, AcuFocus, Inc.
